Summary

Machine learning research engineer working at the intersection of AI and science, bridging scientific ML, biological domain knowledge, production-quality software, and team leadership. I build generative models and take them from prototype to deployment, with a focus on *de novo* peptide sequencing.

Published in *Nature Machine Intelligence* and *Nature Communications*, among other peer-reviewed venues.

Currently looking for Staff/Principal Research Engineer roles in AI for science. Based in Cape Town, open to remote-first roles now and hybrid/on-site roles in Europe or the USA from 2027.

Experience

InstaDeep, Staff Research Engineer, Machine Learning · BioAI Team Lead — Cape Town, South Africa — Aug 2022 – present — 4 years 4 months

- **Tech lead and hiring manager** for two cross-disciplinary **ML research teams** of about 5 to 8 people: *de novo* peptide sequencing (with the Technical University of Denmark) and signal-peptide design for secretion efficiency (with BioNTech).
- Delivered a **client collaboration with Syngenta**, applying **genomic language models** (AgroNT, a Nucleotide Transformer trained on ~10.5 million genomic sequences spanning trillions of base pairs across 48 plant species) to accelerate crop trait research.
- Set **research direction** and take models **from research to production** (InstaNovo is available to commercial customers on DeepChain), balancing scientific rigour with reliable engineering.
- **Lead the BioAI team** of InstaDeep's Cape Town office and serve as the office's **site manager** (an office of about 25 people); hire and grow the BioAI teams across the Cape Town and Kigali offices.
- Directed the team's **ML engineering foundations**: scalable, Transformer-based libraries (Python / PyTorch) for large-scale training on InstaDeep's Kyber (~500 PFLOPs) and EuroHPC's MareNostrum 5 (260 PFLOPs) supercomputers, and the cloud (AWS, GCP).

Barco, Senior Software Development Engineer, Machine Learning — Kortrijk, Belgium — Feb 2020 – Aug 2022 — 2 years 7 months

- Built a TensorFlow Extended production pipeline (orchestrated with Apache Airflow) training deep-learning models on multispectral images to detect and classify melanoma skin cancers for Demetra, Barco's dermatology imaging device.
- Engineered the pipeline with **end-to-end data and model lineage tracking** to deliver the traceability and reproducibility that **regulated medical industries (FDA approval)** require.
- Worked across the research, cloud-backend and mobile/web frontend teams.

Bayer Crop Science, then BASF, Bioinformatics Researcher, Manager of the Python & R Platforms — Zwijnaarde, Belgium — Feb 2018 – Jan 2020 — 2 years

- Owned the **Python/R data-analysis platform** used by **480 researchers and data scientists**: technical support, proactive monitoring and root-cause analysis, **training** (NumPy, pandas, BioPython) and **mentoring** across the company's internal research community.
- The Zwijnaarde site was divested from Bayer Crop Science to BASF as part of Bayer's acquisition of Monsanto; I continued in the same role across the transition.

Applied Maths (acquired by bioMérieux), Bioinformatics Software Developer — Sint-Martens-Latem, Belgium — Sept 2011 – Jan 2018 — 6 years 5 months

- Worked on BioNumerics, a bioinformatics suite for integrated analysis of biological data, writing **custom Python scripts and extensions** for clients in the clinical, academic and government sectors.

Selected publications

InstaNovo enables diffusion-powered *de novo* peptide sequencing in large-scale proteomics experiments — Nature Machine Intelligence — 2025
K. Eloff, K. Kalogeropoulos, …, **J. Van Goey**, …, T. P. Jenkins
Trained on ~63 million spectra; top-ranked in an independent benchmark of 17 de novo tools across 83 datasets; Altmetric attention score 100+ and 120+ GitHub stars.
10.1038/s42256-025-01019-5

InstaNovo-P: a *de novo* peptide sequencing model for phosphoproteomics — Nature Communications — 2026
J. Lauridsen, V. Canbay, …, **J. Van Goey**, …, K. Kalogeropoulos

Education

HOWEST Hogeschool West-Vlaanderen, Microdegree Machine Learning & Deep Learning — Kortrijk, Belgium 2018 – 2019

Katholieke Universiteit Leuven, Bioinformatics (partial credits obtained) — Leuven, Belgium 2010 – 2012

University of Antwerp, M.Sc. Biology — Antwerp, Belgium 1997 – 2004

Universitat de Barcelona, Erasmus interuniversity exchange — Barcelona, Spain 2002

Møglestu videregående skole, AFS intercultural exchange program — Lillesand, Norway 1996 – 1997

Skills

Machine learning: Transformers, diffusion models, large language models (LLMs), supervised & self-supervised learning
Frameworks: PyTorch, TensorFlow / TFX, NumPy, pandas
MLOps: Kubernetes-based ML platforms (AIchor), Docker, CI/CD, workflow orchestration (Airflow, Dagster), experiment tracking (MLflow, Neptune, TensorBoard)
Cloud: Buckets, VMs, Cloud Run (AWS, GCP)
Scale: Distributed GPU training, HPC clusters (InstaDeep's Kyber and EuroHPC's MareNostrum 5)
Bioinformatics: BioPython, BLAST, ClustalW, Snakemake, BioNumerics
Programming languages: Python (primary), R
Spoken languages: Dutch (native), English, French & Norwegian (full professional), German & Spanish (notions)

Projects

Awesome De Novo Peptide Sequencing
A comprehensive, interactive map of the *de novo* peptide sequencing field: algorithms, post-processors, downstream applications, and adjacent tools, deep-learning and classical alike.

Teaching & mentoring

AIMS South Africa MSc supervision — AIMS South Africa, with InstaDeep 2025 – 2026
Co-supervised several AIMS South Africa Master's students at InstaDeep on de novo peptide sequencing and proteomics, including InstaNovo interpretability (sparse autoencoders), diffusion models for mass spectrometry, contrastive-predictive-coding encoder pretraining, glyco-peptide fine-tuning of InstaNovo, and AI-native proteomic database search via contrastive joint embeddings and a transformer-based scoring function.

DTU PhD research stay — InstaDeep, Cape Town, South Africa 2026
Mentored a Technical University of Denmark (DTU) PhD student during a 3-month research stay at InstaDeep Cape Town, developing a foundational model for proteomics with rigorous software-engineering practices, part of the ongoing DTU and InstaDeep collaboration.

Machine Learning for Biology practical — Deep Learning Indaba, Ghana 2023
Mentored the hands-on practical alongside InstaDeep and Google DeepMind colleagues.

Scientific Python training & mentoring — BASF and Bayer Crop Science, Belgium 2018 – 2020
Trained and mentored researchers and data scientists in scientific Python (NumPy, pandas, BioPython) as manager of the Python/R analysis platform.
