Jeroen Van Goey

Staff Research Engineer in BioAI at InstaDeep

Cape Town, Western Cape, South Africa

Summary

Machine learning for protein design and personalized cancer vaccines. #bioinformatics #MachineLearning #ProteinDesign #MLOps #BioML

Experience

InstaDeep

3 years 11 months

Staff Research Engineer in BioAI

July 2024 - Present (2 years)

Cape Town, Western Cape, South Africa

Team lead and hiring manager for BioAI research projects leading two cross-disciplinary research teams:

- * De novo peptide sequencing project in collaboration with the Technical University of Denmark (DTU), leveraging advanced computational biology techniques to innovate peptide discovery and analysis.

- * Signal peptides research in collaboration with BioNTech, focusing on improving secretion efficiency crucial to immunotherapy and vaccine development.

Responsible for recruitment and team expansion, overseeing BioAI position hires for offices in Cape Town and Kigali, ensuring talent alignment with cutting-edge research initiatives and company goals.

Collaborating with academic and industry partners to drive innovation, scientific rigor, and project success.

Senior BioAI Software Engineer

August 2022 - July 2024 (2 years)

Cape Town, Western Cape, South Africa

- Design, implement and deliver performant and scalable protein design libraries - based on a Transformer architecture and written in Python / Jax.
- Perform computationally intensive tasks with large and complex data using distributed systems (on GPUs, TPUs and in the cloud).

Barco

Sr. Software Development Engineer - Machine Learning

February 2020 - August 2022 (2 years 7 months)

Kortrijk

Setting up a Machine Learning production pipeline (using Tensorflow Extended) to train deep learning models on multispectral images to detect and classify skin cancer melanomas. I work together with both the research team as well as the development teams that develop the cloud-based backend and the mobile and web frontends.

BASF

Bioinformatics Researcher - Manager of the Python & R Platforms

August 2018 - January 2020 (1 year 6 months)

Zwijnaarde

- Responsible for the Python and R based data analysis platform used by 480 researchers and data scientists.
- Provide technical and functional support to developers, data scientists and other functions within the BASF network, assist in troubleshooting and day-to-day operational issues.
- Provide monitoring of the platform to proactively identify and resolve issues. Conduct root cause analysis to identify and resolve complex problems impacting service levels.
- Give trainings (NumPy, Pandas, BioPython, ...) and mentor members of the scientific community.
- Identify opportunities to collaborate with key stakeholders both internal and external.
- Participate in external forums and represent BASF in conferences.
- Document the configuration of the system, system controls, and procedures.

Bayer Crop Science

Bioinformatics Researcher & Python Platform Manager

February 2018 - July 2018 (6 months)

Zwijnaarde

(Acquired by BASF Agricultural Solutions)

Applied Maths, a bioMérieux company

Bioinformatics software developer

September 2011 - January 2018 (6 years 5 months)

Sint-Martens-Latem

I worked on BioNumerics, a bioinformatics software suite for integrated analysis of biological data. I wrote custom scripts and extensions in Python for clients in the clinical, academic and government sectors.

a 78 foot superyacht based in the Mediterranean

First mate

July 2009 - September 2010 (1 year 3 months)

Antibes, France

Maintenance of the ship, both engine and deck. Sailing, rigging, anchoring and mooring.

Biogazelle

Programmer intern

February 2009 - March 2009 (2 months)

Lier, Belgium

I wrote an extension on the Eclipse BIRT platform for real-time qPCR analytics software.

EDS Group

Technical Helpdesk Engineer for the Flemish Government

August 2006 - October 2008 (2 years 3 months)

Mechelen, Belgium

Solving a wide range of software problems for the 14.000 officials of the Flemish Government.

Education

University of Antwerp

M.Sc., Biology · (1997 - 2004)

Katholieke Universiteit Leuven

M.Sc., Bioinformatics · (2010 - 2012)

Hogeschool West-Vlaanderen - Vlaamse Autonome Hogeschool

Microdegree Machine Learning en Deep Learning · (2018 - 2019)

Beta

Java EE developer · (2008 - 2009)

Universitat de Barcelona

Erasmus interuniversity exchange · (2002 - 2002)
